Also, as part of a FEMA exercise, the Government flew a half dozen aircraft over the Canadian Radium Site in Mt Kisco NY. There were no issues there. Again, we are just absorbing photons.

We will be in public airspace collecting photon emissions. We will not be collecting photos. Data will only be released to you. We can omit data on private areas if requested.

Are there any access issues for overflights of private residences? Meaning at an existing site with neighboring properties, does the government have any obligations to get access or do all these flyovers conducted in the past just have free access?

I'm for it but defer to the OSC's since they have a better handle on what there addition data needs

are. I would think it would be very helpful at our Trinity Cemetery site. I'm ccing Eric Daly on this to get his input.

Thanks for the offer.

Hey Joe- I spoke w/ Kuda and CMAD can conduct a fly over the Niagara sites on the flight from the WINGs exercise back to TX with no cost to the Region.

However the decision will have to be made ASAP. Kuda will reach out to Eric Daly to see if he wants this support.

I'm offering the above info FYI to advise you that Kuda will reach out to your OSC. Any help you could offer to expedite a decision that would be appreciated.

Mike
